

# 210RR

## RM 2.1

Why Plant This Variety?		
<ul style="list-style-type: none"> <li>• Outstanding White Mold Tolerance</li> <li>• Tall Plant with Moderate Branching</li> <li>• Excellent Yield Potential</li> </ul>		
Agronomics	GMO Traits	RR
	Maturity	2.1
	Height	Tall
	Plant Type	Intermediate
	Pubescence	Light Tawny
	Emergence	Good
	Stress	Excellent
	Lodging	Excellent
Management	Drilled	Excellent
	Rows	Very Good
Disease Tolerance	Phytophthora	RG-1k
	Brown Stem Rot	Good
	Iron Deficiency Chlorosis	Good
	Sudden Death Syndrome	Good
	White Mold	Excellent
Pest Resistance	Cyst Nematode	--

Traits	Description
None	Conventional
GT or RR	Glyphosate Tolerant or Roundup Ready
RR2	Glyphosate Tolerant or Roundup Ready
SCN	Soybean Cyst Nematode Resistance
